Stacking

CCS modulo

Automated stacking, intelligently combined

Fascination for Innovation

CCS modulo

The Modulo Line's fully automated compact stacking unit, CCS Modulo, is the perfect solution for stacking job trays for curing of blocked lenses.

Highly flexible and adaptable the SCHNEIDER stacker supports various different job tray formats and provides the option to adjust the curing times to your individual needs. Designed modularly, the CCS Modulo can be configured to take between 4 and 7 stacks, of up to 10 job trays – allowing you to choose the perfect size to match your capacity requirements.

The full configuration is capable of stacking the throughput of several CCU blockers, making the CCS Modulo the perfect addition to the line.

Benefits

- Sizes to match different capacities
- Supports various tray types
- Adjustable curing times
- High safety standards
- Connected to the Modulo Line environment
- Supports the new cognitive Modulo machine philosophy

technical data	
stacking speed	7s per tray
throughput (average curing time of 30 min)	up to 140 jobs per hour
controller	32-bit embedded PC
maximum stack height	592 mm (23.5 inches) resp. 10 trays
maximum capacity	70 trays
power consumption	0.3 kVA avg.
air requirement	6 bar (87 psi)
machine weight	approx. 290 kg (640 lb.)
dimensions (width x depth x height)	approx. 2610 x 690 x 1720 mm (103 x 28 x 68 inches)

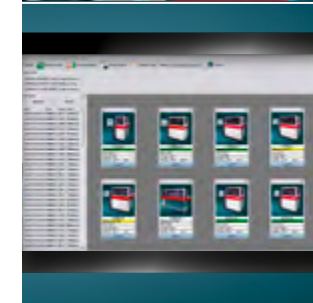

All data subject to change without notice. Please verify details with SCHNEIDER.

Modular design
Different sizes to match your capacity requirements.

High flexibility
The Modulo stacker supports various different job tray formats and allows you to adjust the curing times individually.

Intelligent interfacing
The CCS Modulo is easily connected to the Modulo Line environment.
