

Stacking

CCS modulo

AUTOMATED STACKING,
INTELLIGENTLY COMBINED

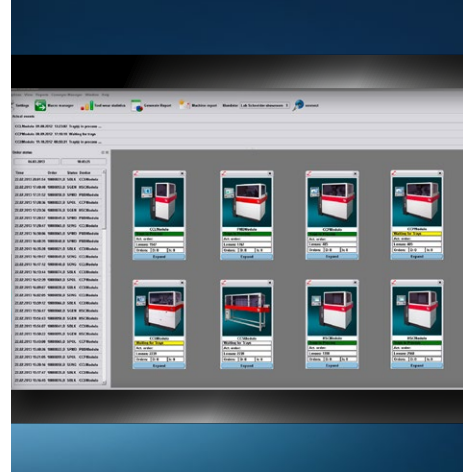

Fascination for Innovation

Different sizes to match your capacity requirements.

The Modulo stacker supports various different job tray formats and allows you to adjust the curing times individually.

The CCS Modulo intelligent interfacing is easily connected to the Modulo Line environment.

Benefits

Sizes to match different capacities

Supports various tray types

Adjustable curing times

High safety standards

Perfect stacking
solution for curing up to
280 blocked lenses.

Capacity adjustable,
can hold throughput of
several CCU blockers.

Modulo ready
on-board interface
allows connection to the
Modulo system.

CCS modulo

The Modulo Line's fully automated compact stacking unit, CCS Modulo, is the perfect solution for stacking job trays for curing of blocked lenses.

Highly flexible and adaptable the SCHNEIDER stacker supports various different job tray formats and provides the option to adjust the curing times to your individual needs. Designed modularly, the CCS Modulo can be configured to take between 4 and 7 stacks, of up to 10 job trays – allowing you to choose the perfect size to match your capacity requirements.

The full configuration is capable of stacking the throughput of several CCU blockers, making the CCS Modulo the perfect addition to the line.

technical data

stacking speed	7s per tray
throughput (average curing time of 30 min)	up to 140 jobs per hour
controller	32-bit embedded PC
maximum stack height	592 mm (23.5 inches) resp. 10 trays
maximum capacity	70 trays
power consumption	0.3 kVA avg.
air requirement	min. 6 bar (87 psi)
weight machine	approx. 290 kg (640 lb.)
dimensions (width x depth x height)	approx. 2610 x 690 x 1720 mm (103 x 28 x 68 inches)
